Exercise Specialist Position at IRG PT

Experience the difference of working for a privately owned and operated company!

IRG is excited to be accepting resumes for our ever-growing business. Our exercise specialists play an integral role in our company and are not only responsible for assisting patients with exercise plans and modalities – but play a crucial role in establishing and maintaining relationships and driving the patient experience. While not a requirement, our ideal candidate is one that has received their undergraduate degree and would like to gain experience in a clinical setting prior to applying or attending PT/OT school or other medical program.

We know there are a lot of job postings out there – *what makes IRG different?*

- 100% independently owned and operated
- Human connection and community involvement is just as important to us as patient care
- Extensive training, professional development ladders, resources, and education so you can advance your skills and plan a path for your future
- Large percentage of our exercise specialists go on to enroll in DPT, PTA, OT, COTA, or other medical professional programs.
- Full administrative, billing and insurance verification team that is local, so you can focus on what matters – our patients.
- Leadership opportunities based on performance, interest, and skill – not just on seniority
