Resources from Anna Marie Trester

- https://careerlinguist.com/resources-for-jobseekers/
Studying linguistics will have applications beyond just jobs, though; it will shape who you are and how you interact with the world.

- You will be a skilled critical thinker
- You will be a good scientist
- You will be a better scholar of human behavior
- You will have a keen awareness of the diversity of the world’s languages, peoples, and cultures
- You will understand the ways in which power and privilege are intertwined with language

The study of language is quite simply something that everyone should know about. Language is what makes us human, and it’s immensely interesting and important!
Thank You!
