

# WWU – Recreation Management and Leadership Tourism-based Internship Internet Resources

Below you will find Internet resources to assist you with your search for an internship. They typically do not direct you to specific internships but rather link you to websites that will help you locate businesses and organizations to approach.

Here are a few tips for using these resources:

- When you find a listing for an organization or business of interest, visit their individual website for further information and contacts.
- Not all organizations offer established internships, but it is possible to approach them about developing an opportunity; your faculty advisor can help with this.
- Although we have checked to ensure that all links are currently working, things can change quickly. Please report non-working links to Katey.
- If you find some good general resources that you do not see on this list, please e-mail the information to Katey.
- For easier management we have organized resources into focus areas but encourage you to look outside your main focus area for additional resources.

## **International Ecotourism Society**

<https://www.ecotourism.org>
